## ✔ What Did We Do?

- ✔ **Design** - leveraging existing relationships and understand of client data and processes was able to confirm requirements and adapt to leading OneStream design
- ✔ **Build** - provided guidance on historical data archiving to meet regulators needs
- ✔ **Train** - Hosted 2 **onsite training sessions for End Users** and **various additional sessions** for system admins and functional process owners. Training decks and other materials provided
- ✔ **Test** - Conducted UAT & SIT to ensure proper application functionality for end users and admins

## ✔ How Did We Help?

- ✔ By collaborating with an engaged finance and accounting team, the project was able to successfully implement a modern technology platform, allowing for the retirement of on-premise servers that had increase security risks.
- ✔ PwC helped develop a technical architecture that facilitates an end-to-end automated data integration.
- ✔ As a result of the implementation, they were able to use out of the box functionality and decreased reliance on custom rules to meet business needs.
- ✔ This is a great logo for OneStream in Boston and the New England area.
